

Handheld Portable Facial Recognition Device

AI-Face-T7HD

AI-Face-T7HD handheld facial recognition device is specially designed for mobile attendance, relying on deep learning facial recognition algorithms to achieve fast and accurate identification.

Portable and flexible, it supports offline operation, breaking through fixed scene limitations, ensuring stable attendance even with poor network conditions.

It also boasts outstanding three-proof performance and strong pressure resistance, adapting to harsh environments, maintaining long-term stable operation, and providing reliable support for complex project personnel management.
